### Video Transcript:

This is the era of electrification. This is the time to build vehicles that are faster, more efficient, and more capable than ever before.

A new world of mobility is taking shape right before our eyes – demanding a new breed of vehicles that can take any form, and any size, and any source of power.

At REE we create the cornerstone upon which the entire future mobility market will build its vehicles, services, and applications. And we call it: the REEcorner.

The REEcorner is a meticulously engineered system that fuses all of the components that make the car go into an incredible compact, efficient and powerful build. Our single wheel x-by-wire technology controls and monitors each corner yielding unparalleled modularity, safety and efficiency. One system that includes motors, drivetrain, steering, braking, suspension and control. It's the cornerstone of a massive revolution.

REEcorner is magnificently modular, allowing for faster times to market at a fraction of the cost. It enables a complete flat EV platform that can carry more passengers, cargo and batteries. And it is agnostic to both power source and manner of control.

Our customers are looking for a different kind of vehicle, one that is tailor-made to meet their needs. That's why we created several REEcorner product lines. From the smallest last mile delivery vehicle to the largest delivery van, whatever your EV vision, REEcorner can carry it, and keep carrying it.

At REE, we're not just in the era of electrification, we're driving it forward. We're the cornerstone of next generation mobility.
